Space Aid Manufacturing was established in 1984 by our parent company M & P Tool Products.

Since our inception, Space Aid has grown and proven itself as a nationwide leader specializing in the design, manufacture and installation of Warehouse Storage Systems including; Cantilever Racking, Flow Systems, Mezzanines, Pallet Racking, Security Fencing and Industrial Shelving Systems. Space Aid continues to provide our customers with dynamic leading edge concepts for projects of any scale.

By achieving and maintaining the highest standard of quality and safety, Space Aid provides our customers with reliable service and a track record of projects being completed safely and on schedule.

CONNECTING YOUR BUSINESS TO THE SERVICE & INSTALLATION
RESOURCES YOU NEED

P.S.R.(Pre-Start Safety Review) /CERTIFICATION

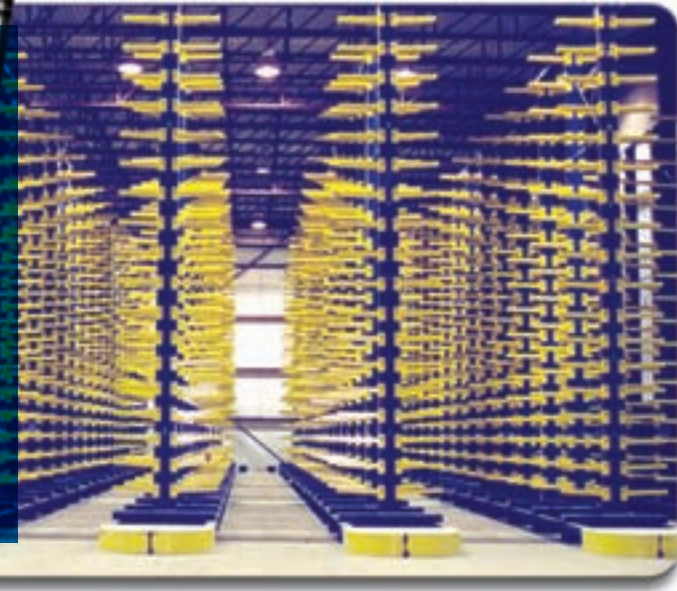

Space Aid offers engineering and consulting services for P.S.R. or Certification of Systems for all types of material handling systems as required in compliance with the applicable provisions of the Regulation for Industrial Establishments as listed in Section 7 of Regulation 851 of the Occupational Health & Safety Act.

DATA CAPACITY PLAQUES

Space Aid can provide data capacity plaques as required to identify the rated capacity of each material storage system. Information is based strictly on P.S.R. or system Certification data.

AUTOCAD INSTALLATION DRAWINGS

Space Aid provides professional AutoCAD drawings for every project installation.

Space Aid Manufacturing has gained a strong reputation as a quality producer of Warehouse Storage Systems by providing our customers with start to finish solutions including conceptual design, manufacturing, installation, engineering and certification services. Cantilever racking, pallet and carton flow systems, mezzanines, UNI RAK pallet racking, security fencing, MAXI SHELF industrial shelving systems and containers are just a few of the many steel storage products we fabricate at our 75,000 square foot facility in Brampton, Ontario.

PREVENTATIVE MAINTANENCE

Space Aid is proud to introduce the launch of our new "Preventative Maintenance Program" involving quarterly, semi-annual or annual Damage Inspections performed by a qualified Space Aid technical representative.

DAMAGE INSPECTIONS

Damage Inspections, including their subsequent reports, provide detailed information on the condition of any existing pallet racking or material storage system. These reports can be used to identify areas that require repairs or replacement of damaged components.

The report issued by Space Aid includes a damage inspection checklist along with a reference layout, a summary report, images to support the checklist, a disclaimer and a quotation for any replacement components or required labour.

flexible solutions for your storage needs

UNPARALLELED SAFETY STANDARDS

Space Aid ensures all installation service team members are fully trained and certified in the use of forklift and elevated platform operation. Additional training includes, but is not limited to; WHMIS, fall arrest and first aid.

All welding performed by in house manufacturing staff or on-site installation team members is performed by C.W.B (Canadian Welding Bureau) certified welders. Space Aid enforces strict compliance policies to guarantee our customers that their projects will be completed in a safe work environment.

Space Aid's installation and service teams adhere to installation guidelines and safe work procedures developed for all product types. In addition to our own guidelines and policies, teams also conform to additional safety regulations instituted by customers.

Space Aid will INSTALL, DISMANTLE and RELOCATE any brand or configuration of racking for new and used warehouse storage systems across the country. This diversification is one of the many reasons why Space Aid has quickly become an industry leader since our establishment in 1984. By maintaining the highest quality of workmanship in all of our projects, providing superior service and striving to maintain the highest level of safety, Space Aid will complete any project on schedule and without incident.

CUSTOM INSTALLATIONS

Space Aid employs a full staff of trained and certified installation team members for projects of any scale. Space Aid's installation teams have experience in a wide range of projects and provide service for all types of material storage systems.

SERVICE & REPAIR

Space Aid is now proud to offer on-site service and repair to all of its customers. Our recently created service department can now provide ongoing service for any brand or configuration of material storage system. The service division is available 7 days a week and can react quickly to address service and repair requirement.

DAMAGE INSPECTIONS

By providing regular damage inspections, customers can be assured that existing storage systems remain in safe operating condition. Damage inspections are completed by qualified technical staff and are an excellent tool in workplace accident prevention.
